

The screenshot shows the OziExplorer software interface with a top toolbar and a map of a mountainous region. The toolbar includes icons for File, Edit, View, and other functions. A red circle highlights the 'Map', 'Waypoint', 'Event', 'Track', and 'Route' buttons. A yellow box in the top right corner contains the text 'This screen print is from Version 3.96.3b'. Several yellow callout boxes provide instructions: 'Make a waypoint', 'Manually make a track', and 'Open Track Control' point to specific toolbar icons. Another yellow box on the left lists 'Very useful' features: 'Show/Hide waypoints', 'Show/Hide tracks', 'Show/Hide Moving Map', 'Activate Area Calculation', and 'Show Track Profile'. A yellow box on the right explains the 'Name Search' function: 'Click to quickly save everything', 'Tells filename of any file in use', 'Navigate in the direction you want to bring up next map', 'Click to "DRAG" waypoints and other "overlay" items around map', 'Zoom', and 'Map View'. The map displays a red track, various waypoints, and geographical features like 'Mt Buller' and 'Wonnangatta Station'. The bottom status bar shows 'Track Points Loaded', 'Waypoints Used : 620 of 10000 (GPS:1000)', and 'Events Used : 0 of 1000'. The Windows taskbar at the bottom shows the system clock at 11:28 PM.

This help file comes to you from MADOG - roger@smartersafety.com.au - www.smartersafety.com.au. If it assists your learning please send a .plt (track) file that you made while traveling one of your favourite tracks for inclusion in the National E-Trek library and as a result receive access to make file withdrawals for your own use.
