

iPhone & iPad Setup Tips

Follow this process to make access on an iPhone or an iPad a real “no brainer” ...

First you must set up this person as a “USER” on your SmarterScreen, and then...

1. Using **Safari (and ONLY Safari)**, type in your SmarterScreen address
 - This is YourUniquePrefix.smarterscreen.com.au
 - Don't know your address? Contact Roger - p0437 771 580 / roger@smartersafety.com.au
2. Enter **Username**
3. Enter **Password**
4. Tick the **Disclaimer Box**
5. Press **Log In**
6. You are now at your SmarterScreen Home Page
7. Tap the icon at the bottom of the page that looks like this
8. This action will bring up a number of selections to choose from
9. Select **Add to Home Screen** (on bottom line)
10. Delete the word “Home” to just read read **“SmarterScreen”**
11. Press **Add** (in top right hand corner).
12. You now have an Icon on your screen that looks like

Simply tap this icon and flash directly into your SmarterScreen home page to do some work.

Now, all there is to do is to move it to the **FRONT SCREEN...**

- ◆ Simply press and hold the icon, this will make all the icons wobble.
- ◆ Do not touch the X in the top corner of any icon unless you want to delete that icon from your screen.
- ◆ To relocate the “SmarterScreen” icon, hold and move it to where you want it to be.
- ◆ To **MOVE THE ICON TO A DIFFERENT SCREEN** I find that by temporarily moving one of the icons on the bottom row which appears on every screen I can now move the icon I wish to move to the bottom row.
- ◆ Now select the front screen and relocate it there.
- ◆ Then come back and put that bottom row icon I moved before back on the bottom row.
- ◆ When finished, tap the home button down on the bottom below the screen and the icons stop wobbling and everything is back to normal.
